# How to futureproof your 3-D Secure ACS with modern authentication and risk intelligence

## Did you know: Outdated authentication could be the weak link in your 3DS program?

Adding modern authentication and risk intelligence to your 3DS ACS creates a unified fraud prevention solution that supports your real customers, only.

High risk

### 3DS ACS with OTP

- Poor cardholder experience
- Authenticates via unsafe and phishable OTPs
- Increases chargebacks

### Benefits of adding fraud risk advice services

- Improves fraud prevention
- Reduces friction
- Maximizes approvals

### Futureproof 3DS with Entersekt

- Keeps your card top of wallet
- Streamlines costs
- Increases transaction success rates

### Benefits of adding advanced authentication

- Increases checkout conversion rates
- Improves cardholder experience
- Ensures regulatory compliance

### With Entersekt's advanced authentication and risk intelligence

- Access real-time risk assessment
- Enables MFA for high-risk transactions
- Leverages biometrics and silent attestation
- Lowers friction and increases security

Low risk

Partner with Entersekt to futureproof your ACS with modern authentication, and deliver best-in-class digital cardholder experiences.
